

TV 31

Tecla TV 31 is a professional chamber vacuum sealer designed to ensure reliability, ease of use and consistent results in vacuum packaging. Thanks to its larger vacuum chamber and 8 m³/h pump, it represents the ideal solution for restaurants, delicatessens and laboratories that frequently use professional vacuum packaging and are looking for a compact yet efficient machine.

PERFORMANCE AND EASE OF USE

Thanks to the larger vacuum chamber compared to the one installed on TV 30, TV 31 allows for greater convenience and flexibility, making it easier to package bulkier products or multiple items at the same time. This translates into improved efficiency in daily operations. The digital control panel with 20 customizable programs allows precise adjustment of working parameters, making the process repeatable and easy to manage even by multiple operators: simply close the lid and TV 31 will do the rest.

SOLID CONSTRUCTION DESIGNED TO LAST OVER TIME

TV 31 is manufactured in Italy using high-quality Italian components. The vacuum chamber and body are made of AISI 304 stainless steel: a hygienic and corrosion-resistant material. A dedicated program allows automatic oil dehumidification, extending the lifespan of the pump. Everything is designed to ensure long-term durability, even in the most demanding professional environments.

MAXIMUM VERSATILITY

The inert gas flushing function for MAP packaging expands the range of applications and can be activated or deactivated via the digital display. The compact size of the machine makes it easy to integrate into any kitchen or laboratory, without sacrificing power and reliability.

WHEN TO CHOOSE TV 31

TV 31 is the ideal choice for those looking for a compact professional chamber vacuum sealer with higher capacity than entry-level models. It is particularly suitable for businesses that require a reliable machine for daily use, offering an excellent balance between performance and size.
