

TV 31 Turbo

Tecla TV 31 Turbo is a professional chamber vacuum sealer designed for those who require superior performance and maximum packaging speed.

Thanks to its powerful 12 m³/h vacuum pump and advanced features, it is the ideal solution for businesses that frequently use vacuum packaging and aim to achieve maximum productivity.

HIGHER SPEED AND PRODUCTIVITY

TV 31 Turbo, equipped with a professional 12 m³/h vacuum pump, offers significantly faster cycle times compared to TV 31, which features an 8 m³/h pump. This allows you to reduce processing times and improve workflow efficiency.

The digital control panel with 20 customizable programs enables precise control of every stage of the cycle or fully automatic operation: simply close the lid and the machine will do the rest.

TECLA CHEF ASSISTANT PRO: ADVANCED PROCESSING IN ANY KITCHEN

With Tecla Chef Assistant Pro, TV 31 Turbo goes beyond vacuum packaging and becomes an active processing tool. A dedicated program assists the user with a controlled vacuum cycle, helping to:

- marinate food in just a few minutes
- degas creams and liquid preparations, improving texture and presentation
- clean delicate products such as mussels and clams

This system transforms complex operations into simple and repeatable processes, improving the final product quality.

The integrated inert gas function allows modified atmosphere packaging (MAP), expanding the machine's range of applications.

RELIABILITY AND BUILD QUALITY

TV 31 Turbo is manufactured in Italy using high-quality Italian components. The vacuum chamber and body are made of AISI 304 stainless steel: hygienic and corrosion-resistant.

A dedicated program performs automatic oil dehumidification to extend the pump's lifespan.

WHEN TO CHOOSE TV 31 TURBO

TV 31 Turbo is ideal for those looking for a fast and versatile professional chamber vacuum sealer, compact in size and equipped with advanced features that go beyond standard packaging.
