

Vacuum 12

Vacuum 12 is the most compact **professional external vacuum sealer** in the Tecla range, designed for those who need a reliable, Made in Italy vacuum packaging machine.

With a **38 cm sealing bar** and a **16 L/min self-lubricating pump**, it guarantees fast and consistent cycles, without requiring maintenance.

Its **stainless steel body** ensures hygiene, strength, and long-lasting durability, making it the ideal **compact vacuum sealer for restaurants, delicatessens, food shops, and small laboratories**.

The vacuum process starts automatically by lowering the lid, while sealing is activated manually with a button.

Thanks to the **vacuum level indicator**, the operator can precisely check the vacuum achieved, obtaining professional and safe packaging every time.

Features and Advantages

- **Compact and affordable** - smallest in the Tecla professional range
- **16 L/min maintenance-free** self-lubricating pump
- **Robust stainless steel structure**, hygienic and easy to clean
- **Manual sealing command** perfect also for delicate foods
- **Vacuum level indicator** for maximum control
- **Made in Italy** quality and reliability

Applications

The Vacuum 12 professional external vacuum sealer is suitable for:

- **Small restaurants and delis** needing compact professional packaging solutions
- **Food shops and labs** with moderate but regular vacuum sealing needs
- **Advanced home users** looking for a durable, Made in Italy vacuum sealer
