

Vacuum 33 Industrial 80

The **Vacuum 33 Industrial 80** by **Tecla** is the **intermediate model** in the external industrial vacuum sealer range, designed for **large-format packaging** and continuous professional use.

With its **80 cm opposing double sealing bar system**, this **industrial vacuum sealer** reliably seals even thick or aluminized bags, ensuring strong and uniform closures.

Equipped with a **100 L/min self-lubricating vacuum pump**, it guarantees extremely fast cycles, a consistently deep vacuum and **zero maintenance** - no oil changes required.

Its robust **stainless steel construction** makes it ideal for intensive professional applications, ensuring durability, hygiene and long-term performance.

Key Features

- **Opposing 80 cm double sealing bar**, ideal for large bags or multiple packs
- **100 L/min self-lubricating vacuum pump** fast cycles, deep vacuum, no maintenance
- **Secure sealing** even with thick and aluminized bags
- **Automatic upper bar** applies pressure when needed during sealing
- **Satin-finished stainless steel** hygiene, strength and durability

Advantages

- Perfect for large formats and multiple bag sealing in a single cycle
- Rapid cycles with superior vacuum for safe preservation
- Maintenance-free pump: no oil changes, no downtime
- Professional performance for continuous production
- Reliable Made in Italy quality and precision

Fields of Application

- **Food industry** packaging large products such as meat, cheese and cured meats
- **Large-scale production** continuous packaging lines and logistics
- **Non-food sectors** vacuum protection of textiles, mechanical components, bulky samples or sensitive materials

The Vacuum 33 Industrial 80 is the ideal industrial vacuum sealer for large formats: 80 cm double sealing bar, 100 L/min self-lubricating pump and professional reliability.
