

Vacuum 33 Maxi 80

The Vacuum 33 Maxi 80 vacuum packing machine is the flagship of Tecla's range of external suction packaging machines. It is a packaging machine suitable for professional users, it is extremely reliable and is able to easily withstand significant workloads. Thanks to the very high construction quality and the self-lubricating pump, the need for maintenance is reduced to a minimum.

The machine is entirely Made in Italy to further guarantee long-lasting operation. Although it is a technically cutting-edge professional vacuum packing machine, Tecla Vacuum 33 Maxi 80 maintains the characteristics of ease of use that distinguish Tecla products.

Vacuum 33 Maxi 80 by Tecla is equipped with two sealing bars of which the upper one has an electromechanical movement which is pushed downwards during sealing towards the fixed lower one, a feature which, in association with a length of the sealing bar of 800 mm and a powerful pump of a total of 100 liters per minute allows you to vacuum pack in an extremely simple and fast way practically any type of food. The bodywork is in satin stainless steel, therefore the machine is resistant and easy to clean.

Vacuum 33 Maxi 80 is compatible with every type of vacuum bag: it works with smooth and embossed bags.

Technical data	
Model	Vacuum 33 Maxi 80
Voltage	230 Volt - 50 Hz
Power	600 W
Sealing bar	2 x 800 mm
Vacuum Pump	double body, total capacity 100 L/min
Cycle control	Electronic card
Material	Brushed stainless steel
Weight	Kg 35
Dimensions	910 x 360 x 270 mm
Regulation	CE
