

King Automatic 30

TECLA King Automatic is a professional vacuum machine of reduced dimensions, adaptable for both professional and domestic use, it is versatile and takes up little space, with positioning functions in any operating environment as well as easily moved and transported.

The stainless **steel** structure gives this vacuum **packaging machine** a robust and professional appearance and allows it to be integrated into any work environment or domestic kitchen..

The **machine** boasts **extreme reliability**: the control panel is digital and the pump is **very powerful** and performing self-lubricating therefore it does not require any maintenance.

The quality of the components, strictly **Made in Italy**, is a guarantee of **reliability** and perfect and lasting functioning.

With **Kink Automatic** it is possible to use vacuum **bags either smooth or embossed**.
