

Vacuum 33 Industrial 95

Vacuum 33 Industrial 95 by **Tecla** is the largest model in our **industrial external vacuum sealer** range, specifically designed for **large-format packaging** and continuous industrial production.

With its **innovative 95 cm opposing double sealing bar system**, this **large format vacuum packaging machine** can reliably seal even thick or aluminized bags, ensuring strong, uniform and long-lasting closures.

The **100 L/min self-lubricating vacuum pump** delivers extremely fast cycles and a consistently deep vacuum, without any maintenance or oil replacement.

Its robust **stainless steel structure** is built to withstand intensive use, guaranteeing maximum reliability, durability and hygiene over time.

Key Features

- **Opposing 95 cm double sealing bar**, ideal for large formats or multiple bags per cycle
- **100 L/min self-lubricating vacuum pump** high speed, deep vacuum, zero maintenance
- **Compatible with thick and aluminized bags** secure, durable sealing
- **Automatic upper sealing bar** applies pressure when needed for perfect closure
- **Satin-finished stainless steel** hygienic, robust and built to last

Advantages

- Perfect for large packaging formats and multiple bag sealing
- Fast cycles with a consistently superior vacuum for safe and extended preservation
- Zero pump maintenance - no oil changes required
- Reliable performance for intensive industrial production
- Quality and reliability Made in Italy - professional durability guaranteed

Fields of Application

- **Food industry** vacuum sealing of large products such as meats, cheeses and cured goods
- **Large-scale production** logistics, continuous packaging of high volumes
- **Non-food sectors** vacuum protection of textiles, mechanical components, bulky samples or sensitive materials

The Vacuum 33 Industrial 95 is the ultimate industrial vacuum sealer for large formats: 95 cm double sealing bar, 100 L/min self-lubricating pump and uncompromising performance.
