

Vacuum 33 Maxi 95

The Vacuum 33 Maxi 95 vacuum packing machine is the flagship of Tecla's range of external suction packaging machines. It is a packaging machine suitable for professional users, it is extremely reliable and is able to easily withstand significant workloads. Thanks to the very high construction quality and the self-lubricating pump, the need for maintenance is reduced to a minimum.

The machine is entirely Made in Italy to further guarantee long-lasting operation. Although it is a technically cutting-edge professional vacuum packing machine, Tecla Vacuum 33 Maxi 95 maintains the characteristics of ease of use that distinguish Tecla products.

Vacuum 33 Maxi 95 by Tecla is equipped with two sealing bars of which the upper one has an electromechanical movement which is pushed downwards during sealing towards the fixed lower one, a feature which, in association with a length of the sealing bar of 950 mm and a powerful double-body pump with a flow rate of 100 l/m, allows you to vacuum-pack practically any type of food in an extremely simple and quick way. The bodywork is in satin stainless steel, therefore the machine is resistant and easy to clean.

Vacuum 33 Maxi 95 is compatible with every type of vacuum bag: it works with smooth and embossed bags.

Technical specifications	
Model	Vacuum 33 Maxi 95
Voltage	230 Volt - 50 Hz
Power	600 W
Sealing bar	2 x 950 mm
Vacuum pump	double body, total capacity 100 L/min
Cycle Control	Electronic card
Material	Brushed stainless steel
Weight	38 Kg
Dimensions	995 x 360 x 270 mm
Regulation	CE
