

Embossed vacuum bags 20 x 30 cm

Our quality bags for vacuum packaging, in 20 x 30 cm format.

The bags are embossed, therefore they work both with external suction machines and with bell machines.

What might seem like a simple knurling is actually a dense network made up of hundreds of channels and enables air extraction that is significantly quicker and more efficient than that guaranteed by smooth bags. One of the two sides of the bag is completely transparent, to allow the product to be seen during and after packaging.

The package is 100 pieces. It is also possible to purchase cartons containing 16 packages, for a total of 1600 vacuum bags.
