

Vacuum 33

Vacuum 33 by **Tecla** is a **professional vacuum sealer** engineered for those who need reliability, versatility, and ease of use in a professional environment.

Featuring a **50 cm opposing double sealing bar** and an **integrated liquid protection filter**, this vacuum packaging machine handles not only standard bags but also thick or aluminized ones used in packaging coffee, cured meats, and other delicate products.

Its **40 L/min self-lubricating vacuum pump** ensures high performance without regular maintenance, making the Vacuum 33 a durable, practical, and robust solution for intensive use.

Key Features

- **Opposing 50 cm double sealing bar** for simultaneous sealing of multiple bags or larger formats
- **Compatible with thick and aluminized bags**, including those for coffee and cured meats, using combined heat and pressure sealing
- **Advanced sealing system** the upper bar lowers automatically during the cycle, pressing the bag for a perfect seal
- **40 L/min self-lubricating pump** for strong performance with zero maintenance
- **Integrated liquid protection filter** to safeguard the pump from accidental liquid or moisture exposure
- **Satin stainless steel structure** hygienic, strong and easy to clean

Advantages

- Professional-grade performance with minimal upkeep required
- Ability to seal thick and aluminized bags that many other machines cannot handle
- Fast and consistent cycles thanks to durable pump design
- Increased safety and extended lifespan with liquid protection filter
- Flexibility for large or multiple bag sealing thanks to the 50 cm bar

Fields of Application

- **Food labs and delicatessens** for daily packaging of fresh or processed goods
- **Roasteries and cured meat producers** ideal for thick or aluminized packaging such as that used for coffee and charcuterie
- **Professional catering and smaller industrial setups** requiring repeated, high-volume cycles
- **Non-food sectors** electronics components, mechanical parts, lab samples, paper, and collectible items - for protection against oxidation, moisture, and dust

Vacuum 33 is the professional external vacuum sealer that combines power, practicality and versatility: 50 cm opposing sealing bar, self-lubricating pump, liquid protection filter, and ideal performance for demanding conditions.
