

Vacuum Matic

A powerful and reliable professional vacuum machine that packages with just one touch: it is the new Vacuum Matic.

Just insert the vacuum bag and lower the lid: the machine starts to suck in the air and seals automatically when the sensor detects the right level of vacuum.

For more demanding users, it is also possible to use manual sealing which allows you to seal the bag by pressing a button, for example to avoid crushing a delicate product.

With all Tecla packaging machines, including Vacuum Matic, it is possible to use both smooth and embossed vacuum bags and rolls.

Technical specifications	
Model	Vacuum Matic
Vacuum pump	New version - Self-lubricated - 40L/min
Sealing bar	430 mm
Material	Brushed stainless steel
Power	500 W
Cycle control	Electronic Card
Voltage	230 V - 50 Hz
Dimensions	570 x 270 x 158 mm
Weight	10 Kg
Regulation	CE
