
TECLA

Lid Vacuum Plus Turbo

The **Lid Vacuum Plus Turbo** by **Tecla** is the most powerful model in the series, designed for **professional needs and intensive use**. Equipped with a **40 L/min vacuum pump** and a **29 cm high chamber**, it ensures a strong and consistent vacuum even with frequent use and large batches.

Perfect for preserving sauces, creams, spices, and delicate products in **Mason jars** and other **screw-top glass jars**, it eliminates crushing risks and guarantees **long-lasting freshness** and **food safety**.

In addition, the Lid Vacuum Plus Turbo supports **Mason jar sous-vide cooking** – an innovative technique that lets you cook directly inside the jars, keeping aromas and nutrients intact.

Why choose Lid Vacuum Plus Turbo Tecla?

- **40 L/min professional pump** faster, stronger vacuum for frequent use.
- **29 cm chamber height** accommodates tall Mason jars or stacks multiple small jars in one cycle.
- **Built for intensive use** consistent performance even in demanding environments.
- **Mason jar sous-vide cooking** healthy cooking inside jars that preserves flavor.
- **Made in Italy reliability** stainless steel build and long-lasting components.
- **Top performance model** ideal for professional kitchens, food labs, and serious makers.

Ideal Applications

- **Restaurants and caterers** preserving large batches in Mason jars with speed and safety.
- **Food labs and artisan producers** working with delicate or semi-liquid products needing high vacuum levels.
- **Local farms and producers** packaging authentic goods in Mason jars, even stacked in the same cycle.
- **Passionate home canners and food enthusiasts** who want professional power in a compact machine.
